CHANGE
No. 1

SUBJECT: The Army Latent Tuberculosis Infection Surveillance and Control Program

therapy had been instituted, this information, along with details of duration of therapy and recommendations for follow-up, will be recorded in the record. TST results will be documented on the DD 2766 PPIP flow sheet, on HHS Form PHS 731 (International Certificates of Vaccination) and in the appropriate electronic format as available.

f. The Composite Health Care System (CHCS II) as an electronic health record will meet the functional requirements of a centralized electronic registry in order to track and store data while ensuring patient privacy. It is Army policy to use this system when it is on-line.

8. Coding. The following International Classification of Diseases, 9th edition, Clinical Modification (ICD-9-CM) Codes are to be used for entering visits related to tuberculosis surveillance and control:

- a. V74.1 Screening examination for pulmonary tuberculosis
- b. V01.89 Contact with or exposure to other communicable diseases.
- c. V01.1 Contact with or exposure to tuberculosis
- d. V68.1 Issue of repeat prescriptions
- e. V72.7 Diagnostic skin and sensitization tests.

9. Program Management Forms.

- a. DA Form 4700, Medical Record-Supplemental Medical Data
- b. DA Form 5569, R, Isoniazid (INH) Clinic Flow Sheet
- c. DA Form 3897-R, Tuberculosis Registry
- d. DA Form 3763, Community Health Nursing - Case Referral
- e. DD 2766, Adult Preventive and Chronic Care Flowsheet
- f. PHS-731, International Certificate of Vaccination
- g. SF 600, Chronological Record of Medical Care
