

Released September 2018 by the Psychological Health Center of Excellence

NOTES:

- Data Source: Military Health System Data Repository (MDR)
- Date of Data Pull: May 2018
- Patients Diagnosed with a given condition is the total number of Active Duty and Active Guard/Reserve patients diagnosed for a given condition within a military treatment facility (direct care) during a given year. (Tables 1.1 - 1.7)
- To be counted in the Sum of Hospitalizations for a given condition metric, a patient needed to have at least one hospitalization (inpatient encounter) diagnosed with the condition of interest in the first or second diagnostic position (i.e., DX1 or DX2) within the direct care network during a given year. Once included, total hospitalizations for each patient by diagnosed condition within a given year were summed together for an overall count. (Tables 2.1 - 2.7)
- Bed Days per Hospitalization (BDPH) was calculated by dividing the sum of bed day for all hospitalizations for a given condition by the sum of hospitalizations for the same condition (Sum of Bed Days for Hospitalizations for Condition X/Sum of Hospitalizations for Condition X; Tables 3.1 - 3.7)

LIMITATIONS:

- All estimates only include patients that seek care for a given condition and are coded with a diagnosis for that condition; therefore, patients not seeking care or not coded with a given diagnosis are not able to be included in these estimates
- “Suppressed” cells indicate that counts were too small to report for that service, component, year, or condition of interest

1. Direct Care Patient Population Counts with Respective Mental Health Disorders
