

Released September 2018 by the Psychological Health Center of Excellence

NOTES:

- Data Source: Military Health System Data Repository (MDR)
- Date of Data Pull: May 2018
- Patients Diagnosed with a given condition is the total number of Active Duty and Active Guard/Reserve patients diagnosed for a given condition within a civilian setting (purchased care) during a given year. (Tables 1.1 - 1.7)
- To be counted in the Sum of Encounters for a given condition metric, a patient needed to have at least one outpatient encounter diagnosed with the condition of interest in the first or second diagnostic position (i.e., DX1 or DX2) within the purchased care network during a given year. Once included, total outpatient encounters for each patient by diagnosed condition within a given year were summed together for an overall count. (Tables 2.1 - 2.7)
- Outpatient Encounters per Patient (EPP) can be calculated by dividing the Sum of Encounters for a given condition by the Patients Diagnosed for the same condition (Sum of Encounters for Condition X/Patients Diagnosed for Condition X; Tables 3.1 - 3.7)

LIMITATIONS:

- All estimates only include patients that seek care for a given condition and are coded with a diagnosis for that condition; therefore, patients not seeking care or not coded with a given diagnosis are not able to be included in these estimates

1. Purchased Care Patient Population Counts with Respective Mental Health Disorders
